

FR1-auto Tying Machine

100% sealed knoter

High-pressure washable

One-piece frame

Reduced maintenance costs

FR1-auto Tying Machine

THE automatic sealed tying machine

Cutting-edge technology

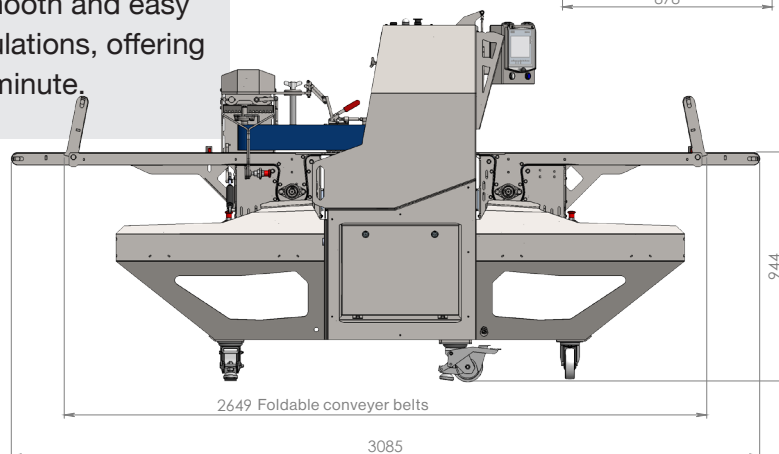

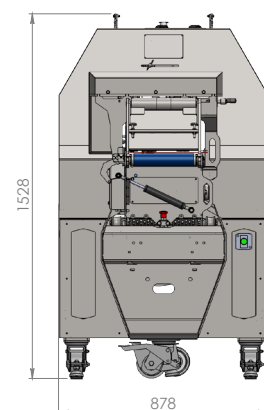

The FR1 auto is the **most advanced automatic rotating tying machine** in the agri-food industry. It is outfitted with an **entirely sealed knotter** that provides the machine with impeccable hygiene and protection for all its moving parts, while reducing maintenance costs. Its **one-piece frame** makes it easy to move and handle and offers excellent machine stability. Its **SIEMENS wide touchscreen control** includes many different features such as one-, two- or three-wrap tying, various tying speeds, centre-to-centre distance adjustment, production data and more.

Ideal for tying **cured meats, roasting cuts, pork belly and loin**, the FR1 auto makes meat-tying tasks smooth and easy for the operator and complies with health regulations, offering an operational speed of up to 80 strokes per minute.
