LSI Tying Machine

MADE IN FRANCE

Infrared safety feature

Easy to use

Very fast cycle time

Less packaging

LSI Tying Machine
Simple and effective

An ARC exclusive

Fast, compact and easy to use, the LSI tying machine is particularly recommended for industrial use.
It's the world's only bunching machine fitted with an infrared safety feature. It improves operator productivity and comfort.
The LSI range benefits from unique ARC knotting technology: a sealed unit reducing maintenance costs.

This LSI machine is very popular for bundling cable coils, wires or cable harnesses, but also any types of manufactured products. Several versions are available depending on the size of products to be bundled together.

Demo video

unit of measurement: millimetre
