

MAS Bunching Machine for asparagus

Weighing control

Improved productivity

Less packaging

Less physical strain

MAS Bunching Machine for asparagus

Combine weighing and bunching

A machine designed for asparagus

The MAS bunching machine was developed by ARC to meet the **automation needs of asparagus growers**.

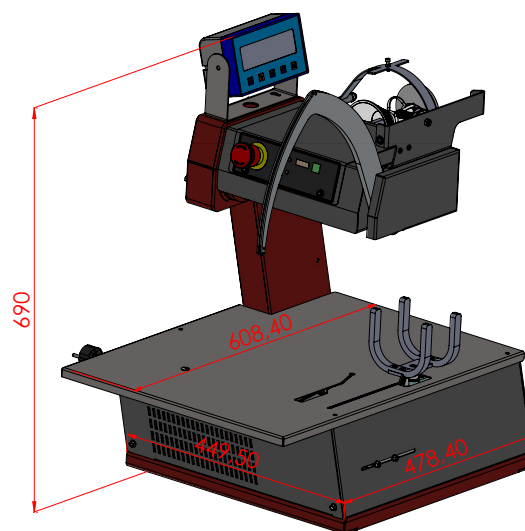

This manually-operated machine combines weighing and bunching.

Perfect for packing **large quantities**, it helps reduce the physical strain of certain tasks whilst improving productivity in the packing workshop.

Equipped with ARC technology, it is particularly well suited to small and medium-scale production.

The digital display on the scales helps optimise bunch weighing

Unit of measurement: millimetre

Technical Information:

Scales	Digital display
Consumables	Single, triple or woven elastic string
Trigger	Holder rotation
Power	220 V
Cycle time	0.6 seconds

Our commitments for a cleaner industry.
