

RACK Banding Machine

Less physical strain

Use of paper strips

Custom printing

Compact and high speed

RACK Banding Machine

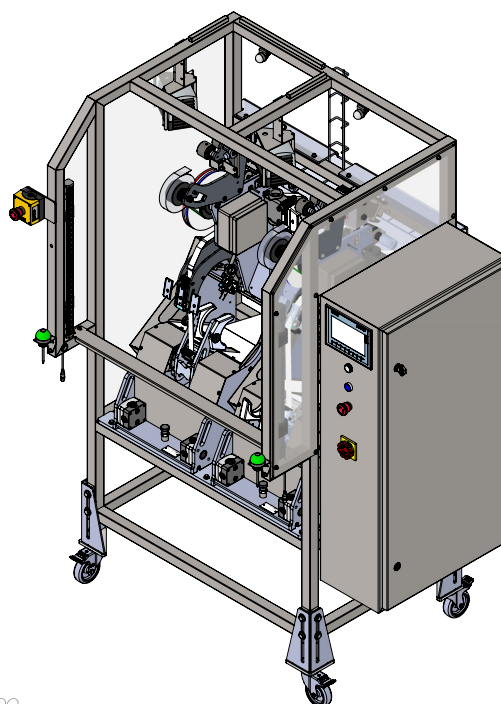

Productivity in confined spaces

ARC's expertise

The RACK is a 2- or 4-head banding machine that can wrap several products at the same time. Fitted with specific holders for each product, the tool is perfect for bunching all types of product individually or in batches. It is very compact and can fit in seamlessly at the end of a washing or grading line. It is an alternative to high-speed packing lines that take up a large amount of floor space.

ARC's RACK is compatible with an optional inkjet printer to manage the tracking information that helps identify the product (date, batch number, etc.).

Demo video

Technical Information:

Version	2 or 4 heads
Consumables	Paper strip or plastic strip
Strip width	From 19 to 30 mm
Trigger	Side
Power	220 V or 110 V
Cycle time	1.2 seconds

Our commitments for a cleaner industry.
