

SE2 Banding Machine

Quick and easy

Less physical strain

Use of paper strips

Double banding on long products

SE2 Banding Machine

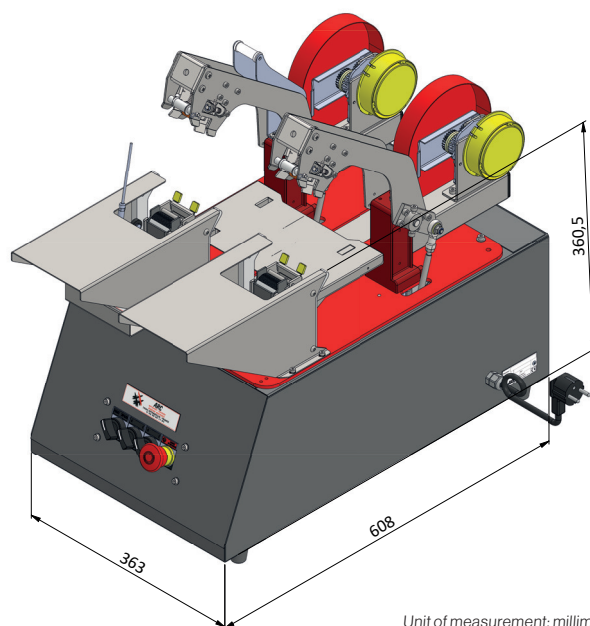

The solution for long products

ARC's expertise

Ultra fast and **very easy to use**, the SE2 is an essential tool for bunching or banding **long products** that need to be secured in 2 places. It provides a long-lasting hold with tapes of varying widths (19 to 30 mm). The SE2 is compatible with the use of **paper strips** and helps **reduce the use of plastic** in packing solutions. The strip can hold the bunch together for several days, even for damp products.

The SE2 is compatible with an **optional inkjet printer** to manage the tracking information that helps **identify the product** (date, batch number, etc.).

Unit of measurement: millimetre

Demo video

Technical Information:

Version	Double head
Diameter of eligible products	Up to 140 mm
Consumables	Paper strip or plastic strip
Trigger	Side
Strip width	From 19 to 30 mm
Power	220 V or 110 V
Cycle Time	1.2 seconds

Our commitments for a cleaner industry.
